

I am shocked that near total monopolization of local markets hasn't satisfied these people. The USA is all about competition, I was forced to move to XM Radio by members of the NAB, with their repetitive programming of content. XM provides me with an outlet to escape the tripe aired by radio stations today, finally I have a choice. Do not allow the NAB to pressure you into removing their competition.

Instead, you tell them to get with the program, or go out of business. It's the American way!
